

HERE Navigation Map in NDS

NDS Public Conference
September 2020

What is the HERE Navigation Map in NDS?

“An NDS publication that covers the needs for a complete set of premium IVI navigation use cases.”

HERE Navigation Map Offering

The HERE Navigation Map is a fully functional NDS implementation to support IVI use cases. It is the map where new features become available first.

The HERE Navigation Map provides the most up-to-date content at an attractive price point.

HERE works on map solutions in compliance with requirements given by local authorities. Map data can be published even in sensitive markets.

HERE's product documentation and NDS Filling Spec will include the details on all configurable parts of the implementation.

The HERE Navigation Map not just includes NDS map data itself but also an effective way to deliver and update the map on the customer side.

HERE Navigation Map in NDS is up-to-date!

It offers access to device ready HERE content shortly after corresponding HERE Map data releases.

Monthly and quarterly updates are provided. End-to-End data freshness is constantly improving.

Update Region packages and incremental patches are provided with each release

Seamless integration of all navigation relevant basic and premium HERE content products, e.g. HERE Maps, HERE Guidance & Routing, HERE Road Infrastructure & Usage, HERE Road Rules & Regulations, HERE Lanes, HERE Places & Points, HERE Areas & Boundaries, HERE Buildings & Structures, HERE Imagery & Topography

Thank you
